

TANKS, MIXERS AND REACTORS MADE OF STAINLESS STEEL

To simple storage, thermo conditioned, provided with stirrer and/or resistant to the pressure.

TANKS & MIXERS

Tanks, mixers and reactors made of stainless steel

To simple storage, thermo conditioned, provided with stirrer and/or resistant to the pressure.

BOEMA S.p.A. is a leading company in designing and manufacturing tanks, mixers and reactors made of stainless steel.

It can offer a really wide range of tanks, with capacity up to 80.000 litres proposing, according to the product treated and to the needs of the customer, different solutions to stir and thermocondition the content.

juice

water and soft drink

wine

beer

milk

oils

chocolate

ice cream

TANK FARM

Boema S.p.A. designs and manufactures turnkey plants to store, distribute and dose liquids. Beside these tanks, the plants can include distribution pipings (also jacketed) and thermo stating and pumping unit.

INSIGHTS

STORAGE TANK FOR CHOCOLATE/CREAMS

The tanks for chocolate and creams of the series CT are conceived to keep the product in continuous moving and at the correct temperature. These tanks grant an optimal level of finishing and the max. reliability under every condition.

THERMO CONDITIONING SYSTEM

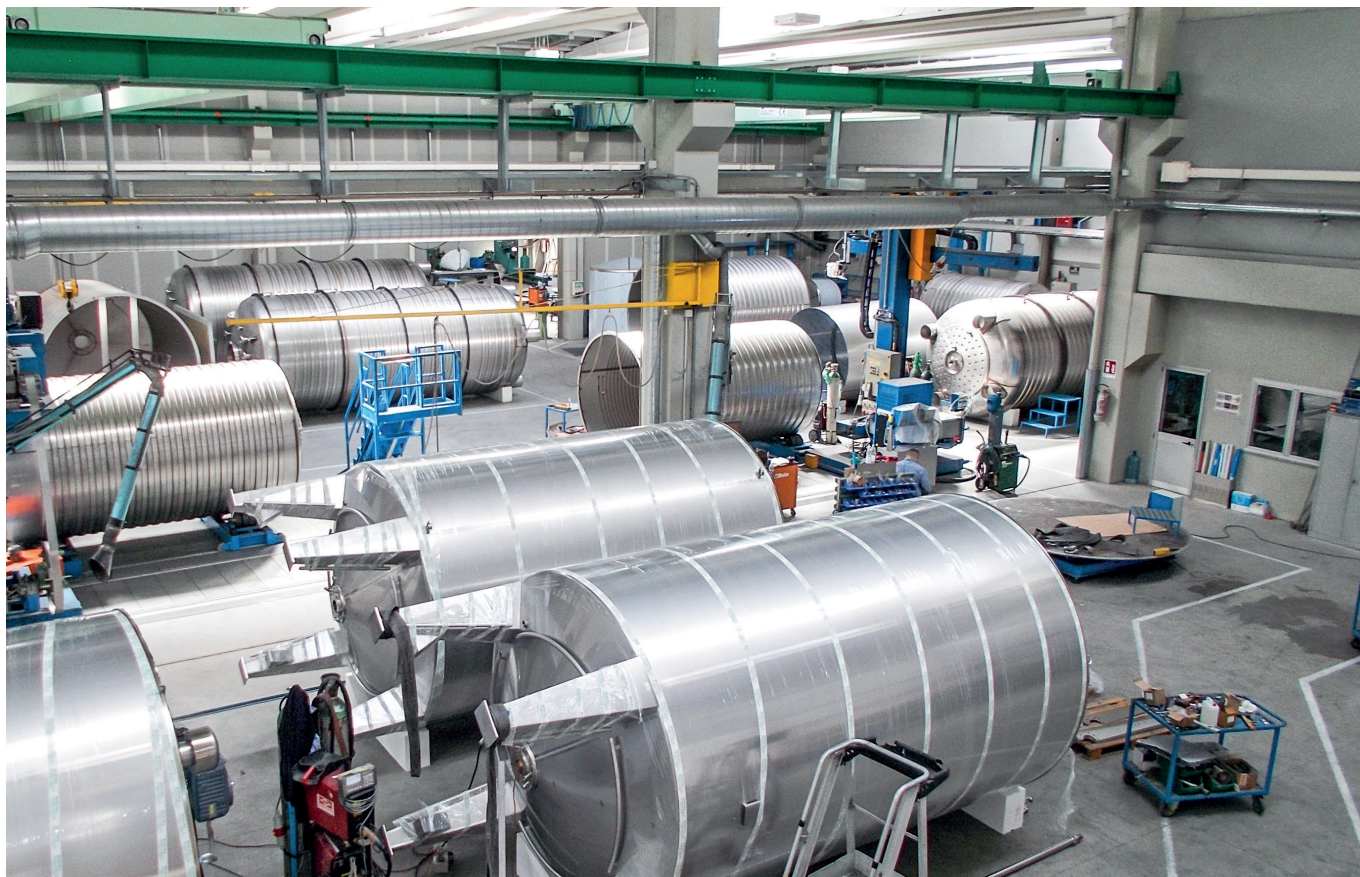

The thermo conditioning interspace is composed of an helicoid raceway welded in automatic. This system grants an optimal efficiency in terms of thermal exchange and the max. reliability (all the interspaces of our tanks are tested at 6 bar).

CIP

Boema S.p.A. designs and manufactures C.I.P. washing fluids preparation plants of various dimensions according to the amount of uses to be served. The system is generally composed of a washing solution accumulation tank, pumps and filters for return fluids and exchanger.

TURBO MIXER TM

The Turbo mixer is the ideal machine to dissolve quickly soluble products or to make homogeneous suspensions of non-soluble products into liquid bases or to obtain greases emulsions and oil in water or other liquid.
